

- Sabre32 pricing is dependent on the *number of modules licensed* and the *number of users licensed*.
- Three modules are available for licensing: Maintenance, Purchasing and Inventory.
- Ten licensed users are included per package (packages outlined below). Each licensed user equals one Sybase database seat. Additional users can be licensed for the fee indicated.
- Rushton International & Associates Inc. is a “CHANNEL ALLIANCE” licensed partner with iAnywhere Solutions (Sybase). Sybase SQL anywhere Studio 9 must be ordered through Rushton International & Associates. This allows licensee information, number of servers and number of seats to be set by Sybase in the SQL Anywhere Studio 9 package. The number of users is also set in the Sabre32 Software.
- Installation and training fees are \$900.00 per Rushton employee per day, plus all traveling expenses.

Annual User Fee:	\$7,000

\*CORPORATE PRICING IS ALSO AVAILABLE, AND IS DETERMINED ON A CASE-BY-CASE BASIS. RUSHTON INTERNATIONAL IS ALWAYS WILLING TO WORK WITH CLIENTS ON AN INDIVIDUAL BASIS.

In an effort to accommodate each individual client, Rushton International offers three different payment options for Sabre32 Maintenance Software:

1. One time, upfront licensing fee + annual user fee: User pays the full, one-time licensing fee upfront, and an annual user fee once a year for the life of the software.
2. One time licensing fee financed over 12- 60 months + annual user fee: User contracts to finance the one-time licensing fee over a period of 12-60 months, paying monthly, quarterly or bi-annual payments. 0% interest rate for the first 6 months. User also pays an annual user fee once a year for the life of the software. Over the course of the finance period, the user may finance the user fee with the licensing fee, or payment may be made separately. After the licensing fee is paid off, the user continues to pay the annual user fee.
3. Month-by-month subscription licensing: User pays a small, upfront fee, and then a monthly payment to license the software on a monthly basis. Subscription prices are based on the number of modules licensed and the number of software users.
